

MOHID ALI KHAN PATHAN

Python Automation | REST APIs | Full-Stack Development

Hyderabad, India | mohidalip@gmail.com | +91 996 338 6486

Software engineer helping businesses automate repetitive work, build web applications, and resolve database and API performance issues. Experience with Python, Django, Flask, React, and SQL, backed by software engineering work at Tata Consultancy Services and end-to-end technical projects.

SERVICES & TECHNICAL EXPERTISE

Automation: Python scripts, data processing, diagnostic tools, and workflow automation.

Web & APIs: Django, Flask, React, Node.js, Express, REST APIs, and JWT authentication.

Databases: SQL, MySQL, PostgreSQL, MongoDB, indexing, and query optimisation.

Delivery: Git/GitHub, Docker, GitHub Actions, AWS, debugging, and technical documentation.

SELECTED PROJECTS

College ERP System | Python, Django, MongoDB, React

- Built an ERP platform for academic, attendance, and financial data covering 1,000+ students and 80+ faculty; developed 18 REST API endpoints and role-based administration.
- Reduced query latency from 4 seconds to under 1.5 seconds by optimising 12 aggregation pipelines and indexes. Added Docker deployment, CI/CD, and administrator documentation.

Car Fandom Platform | MongoDB, Express, React, Node.js

- Built a web platform with 500+ product entries, search, personalised recommendations, and secure JWT authentication; supported 200+ concurrent users.
- Profiled the search API and corrected indexing gaps, reducing response time from 3.2 seconds to 0.8 seconds.

Predictive ML API | Python, TensorFlow, XGBoost, Flask

- Developed a pipeline processing 70,000+ records across four model architectures, achieving 91.3% classification accuracy on a healthcare dataset.
- Improved minority-class recall from 61% to 84% through feature engineering and class balancing; deployed a Flask inference API integrated with a React interface.

PROFESSIONAL EXPERIENCE

Associate Software Engineer | Tata Consultancy Services (TCS) | 2026 - Present

- Maintain database schemas and SQL pipelines; investigate data issues and implement fixes to improve reliability and data quality.
- Develop Python automation and diagnostic scripts, translate stakeholder requirements into technical solutions, and document repeatable troubleshooting procedures.

Salesforce Administrator & Developer Intern | Salesforce | 2023 - 2024

- Configured workflows and data management tools; automated three multi-step business processes using Apex and Salesforce Flow.
- Created five custom reports and two real-time dashboards; validated implementations with stakeholders and documented solutions.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science Engineering (AI Core) | KL University | 2021 - 2025

GPA: 8.94/10

AWS Certified Solutions Architect - Associate | AWS Certified Cloud Practitioner

UiPath RPA Certified Professional
